

# YOGA FLAT GRIP

Thanks to the tiny grains of granite and the structured surface YOGA FLAT GRIP is very slip resistant and also extremely hard-wearing.

#### Sizes:

120 cm × max. 15 m

**Thickness:** 2 mm

**Hardness:** 92 Shore A

#### Surface:

closed with structure

#### Material:

rubber with  
granite sprinkling

#### Fire behavior:

Cfl-s1 (EN 13501-1)

#### Slip resistance:

very good / R11 (DIN 51130)

#### Characteristics

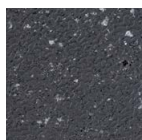

- high slip resistance (slip resistance is supported by the granite)
- environmental compatibility (free from PVC, phthalate plasticizers, halogens)
- made in Germany
- compatible with floor heating systems and castor chairs
- chemical resistance depending on the concentration and exposure time (please request a test sample)
- increased safety thanks to high fire-retardant properties
- contributes to more pleasant room acoustics (high footfall sound absorption: 6–8 dB)
- good for use in indoor areas (for example in industry, the healthcare industry, the education sector, etc.)

#### Cleaning Instructions

YOGA FLAT GRIP is to be wiped dust-binding (with a microfiber mop). For wet wiping, make sure not to use cleaning agents with a pH value above 12.

#### Installation

Adapt the material to the room temperature. Note the direction of the arrow on the back side and place it in the same direction. Then stick with a dispersion adhesive.
