Characteristics

- long service life due to double-sided usability
- the rubber lamellas which are arranged in a wavy pattern give way under pressure and then spring back to their original position, so that dust and dirt are automatically removed
- made of high quality aluminum bars (EN AW-6005-A-T6)
- temperature resistant and hard-wearing
- can significantly reduce the amount of cleaning required
- for loose and fixed installation
- available with or without frame

Cleaning Instructions

For quick and easy cleaning:
brushing is sufficient. For heavier
soiling use high-pressure cleaner.

Verlegung

The rollable and open construction allows
an uncomplicated installation.
Turning the mat (once a year) is
recommended for even wear.

Frame variants

Angle frame / mounting frame

The specially cut profiles are delivered to measure. The assembly of the frame is very simple. The corners and frame profiles are designed very well to fit exactly together. The anchors are pushed into the outer slots. The frames are available in aluminum or brass. Composition: Aluminum AlMg Si 0,5 (silver anodized 25 micron)

The following frame heights are available:

Inner height **10 mm**
(for mat height **8 mm**)

Inner height **15 mm**
(for mat height **12 mm**)

Inner height **20 mm**
(for mat height **17 mm**)

Inner height **25 mm**
(for mat height **22 mm**)

Beveled frame / ramp profile

We recommend a ramp profile for mats that are installed on the floor. If you prefer, this profile can be fixed on the floor using screws. The ramp is supplied with matching corners. The following heights are available in aluminum:

Inner height **12 mm** (for mat height **12 mm**)

Inner height **15 mm** (for mat height **12 mm**)

Innenhöhe **18 mm** (für Mattenhöhe **17 mm**)

Innenhöhe **25 mm** (für Mattenhöhe **22 mm**)
